DEVENDRA SINGH BAGHEL

devendrabaghel0220@gmail.com | GitHub | LinkedIn

PROFILE SUMMARY

Full Stack Developer with production backend experience building and maintaining **Node.js/Express** services for a live logistics platform, alongside hands-on frontend expertise in React and Redux Toolkit. Skilled in **RESTful API** design, third-party system integrations. Currently expanding into Python/FastAPI and AI agent architectures.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), React, Redux Toolkit, React Router, React Hook Form, Tailwind CSS
- **Backend:** Node.js, Express.js, REST API Design, PostgreSQL, Sequelize ORM, MongoDB, Mongoose, JWT Authentication, Bcrypt
- **Tools & Platforms:** Git, GitHub, Cloudinary, Vite, Vercel, VS Code, Claude, Antigravity
- **Currently Learning:** Python, FastAPI, AI agent Architecture, Next.js

WORK EXPERIENCE

Backend Developer | Dropty — April 2026 – Present

- Developed backend features for a production baggage handling and logistics platform serving airline passengers, using Node.js, Express, and **PostgreSQL/Sequelize**.
- Built an end-to-end PDF invoice generation system using **pdfkit** with a modular, reusable document architecture and cloud storage integration.
- Built an AI-powered document extraction pipeline using **Google Gemini Vision API** for automated form processing across multiple airline partners, achieving 90%+ field accuracy and reducing manual form-filling time by 80% .
- Integrated a third-party SOAP/XML airline booking system into the Node.js backend for real-time booking data retrieval.

PROJECTS

NexCart: E-Commerce Store | GitHub — March 2026 – Present

Tech Stack: MERN, Redux Toolkit, JWT, Bcrypt, Cloudinary, Multer, Razorpay (In Progress), Vite

- Engineered full-stack e-commerce platform with RESTful APIs for product management, user authentication, cart, and order processing using Express.js and MongoDB with Mongoose schemas.
- Implemented JWT-based authentication with bcrypt password hashing and role-based access control (admin / user) for protected API routes.
- Built admin dashboard with full CRUD operations for product and order management, including inventory and order status tracking.

StudySync: Collaborative E-Learning Platform | GitHub — April 2025 – July 2025

Tech Stack: MERN, Redux Toolkit, Tailwind CSS, Axios, JWT, Bcrypt, Cloudinary, Multer

- Built a full-stack e-learning platform centralizing notes sharing, doubt discussions, quizzes, and user profiles.
- Designed and implemented RESTful APIs with Express.js, authored MongoDB schemas with Mongoose, and wrote custom middleware for authentication guards and centralized error handling.
- Developed 15+ reusable React components with Redux Toolkit for global state management.

MealMate: Recipe Finder Platform | GitHub | LiveLink — Aug 2025 – Sept 2025

Tech Stack: React.js, React Router, Tailwind CSS, TheMealDB API, EmailJS, Vite, Vercel

- Built and deployed a fully responsive, mobile-first recipe discovery platform with ingredient/meal-name search, persistent localStorage-based favorites, and category-based filtering.

EDUCATION

- Master of Computer Application | Awadhesh Pratap Singh University, Rewa — **CGPA: 8.2**
- Bachelor of Computer Application | Awadhesh Pratap Singh University, Rewa — **65.5%**

CERTIFICATIONS & TRAINING

MERN Stack Training – DUCAT Training Center — Sept 2025 – June 2026

Practical training covering Node.js, Express.js, MongoDB, Mongoose, REST API development, and full-stack project architecture.
